

VINEET TIWARI

Hyderabad, India 500019 | +91 8982210201 | vinceetjccs@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Senior Backend Engineer with 6+ years of experience designing scalable microservices, distributed systems, and cloud-native applications using Java, Spring Boot, Kafka, Redis, and Kubernetes. Experienced in authentication systems, workflow orchestration, event-driven architectures, and AI-integrated backend platforms. Strong expertise in concurrency, system design, API security, and high-availability enterprise applications.

SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript
- **Backend Technologies:** Spring Boot, Microservices Architecture, REST APIs, Spring Security, Spring Data JPA, Hibernate, Node.js, Design Patterns
- **Concurrency & System Design:** Multithreading, Concurrency, Executor Framework, Scalable Architecture, High Availability, Low-Latency Systems, Data Structures & Algorithms
- **Distributed Systems:** Kafka, Redis, Event-Driven Architecture, API Gateway, Distributed Locking, Rate Limiting, Idempotency, Caching Strategies
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, CloudWatch, Kinesis), Docker, Kubernetes, OpenShift, Jenkins, ArgoCD, GitHub Actions, CI/CD Pipelines
- **Security & Authentication:** OAuth2, JWT, SAML, OIDC, API Security, Single Sign-On (SSO)
- **Databases:** PostgreSQL, MySQL, Redis, Query Optimization, Indexing
- **AI Integration & GenAI:** RAG (Retrieval-Augmented Generation), LLM Integration, Embeddings, Vector Databases, Prompt Engineering
- **Testing & Automation:** JUnit, Mockito, Pytest, Playwright, Unit Testing, Integration Testing, Automation Frameworks
- **Frontend & Integration:** React, HTML, CSS, REST API Integration

PROFESSIONAL EXPERIENCE

Backbase India Pvt Ltd Senior Backend Engineer

Jan 2026 – Present

- Designed and implemented **Camunda BPMN**-based workflow orchestration for banking microservices using **Spring Boot and Java Delegates**, improving process automation and operational scalability.
- Optimized workflow execution and backend service communication, **improving process response time by ~30%** in distributed banking workflows.
- Enhanced orchestration reliability and **exception-handling mechanisms**, **reducing workflow failures** and improving transaction processing stability.
- Improved **deployment efficiency through CI/CD pipeline optimizations** and containerized release workflows in **Kubernetes environments**.
- Contributed to scalable event-driven **backend architecture capable of handling high-volume transaction orchestration** across distributed services.
- Reduced backend processing latency through **asynchronous workflow integration** and efficient service orchestration strategies.
- Improved system observability and **debugging efficiency** using structured logging and monitoring practices for distributed workflows.
- Supported high-availability backend services by implementing **resilient workflow orchestration and fault-tolerant processing mechanisms**.

Infor India Pvt Ltd Software Engineer

Dec 2023 – Jan 2026

- Contributed to the **Security Token Service (STS) platform** powering authentication and authorization services for Infor CloudSuite enterprise applications.
- Implemented secure **Single Sign-On (SSO) solutions using OAuth2, SAML, and OpenID Connect (OIDC)** protocols for multi-tenant SaaS environments.
- Developed token lifecycle management, session handling, and **Single Logout (SLO)** mechanisms to strengthen authentication reliability and security compliance.
- Optimized authentication workflows and backend service integrations, improving login efficiency and reducing token validation latency.
- Worked closely with platform and cloud teams to ensure scalable and highly available **identity management services**.
- Led debugging, root cause analysis, and production issue resolution for authentication-related incidents across enterprise applications.

Innominds Software India Pvt Ltd Associate Software Engineer

Jul 2021 – Nov 2023

- Designed and optimized scalable backend services using Java and Spring Boot, **supporting high-availability applications with 99.9% uptime**.
- Improved API response performance by **~40%** through query optimization, asynchronous processing, and efficient caching strategies.
- Standardized ML data processing workflows with automated validation and cleaning pipelines, **reducing data inconsistencies by 25%**.
- Designed scalable backend modules integrating PostgreSQL, Redis, and event-driven communication patterns.
- Participated in system **debugging, production monitoring, and performance optimization initiatives**.

- Collaborated with development and product teams to resolve technical blockers, **improving release cycle efficiency by ~10%**.
- Built debugging tools and inventory management solutions, **delivering 15+ features that improved application** stability and issue resolution.
- Developed and maintained backend modules and REST APIs to support core business functionalities and internal workflows.
- Contributed in **requirement analysis, feature development, testing**, and production deployment within agile development cycles.
- Optimized **application performance and fixed critical production issues**, improving system reliability and user experience.

PROJECTS

Trade Allocation Microservices

- Architected distributed trade allocation microservices using **Spring Boot, Kafka, and Redis** with support for idempotency, distributed locking, and rate-limited transaction processing.
- Implemented event-driven **workflows and caching strategies** to improve throughput and system resilience.
- Applied concurrency-safe processing techniques and distributed coordination mechanisms for **high-volume transaction workflows**.
- GitHub: [Trade Allocation Microservices](#)

DevMind AI – Enterprise RAG Knowledge Assistant

- Built an enterprise-grade AI knowledge assistant using **Retrieval-Augmented Generation (RAG)**, embeddings, vector search, and LLM integration.
- Designed document **ingestion pipelines, semantic search workflows, and contextual Q&A systems** for enterprise knowledge retrieval.
- Integrated **Kafka-based asynchronous processing and Redis caching** to improve scalability and response efficiency.
- GitHub: [DevMind AI – Enterprise RAG Knowledge Assistant](#)

Workforce Orchestration System

- Backend system for **employee scheduling, slot booking, location-based work validation, and automated pay calculation**.
- Designed state-driven workflow engine with idempotent APIs and concurrency-safe slot allocation.
- Implemented **location-aware execution tracking** with event-driven lifecycle and rule-based pay computation.
- GitHub: [Workforce Orchestration System](#)

Automation Testing Framework

- Built scalable end-to-end automation testing framework using **Playwright, TypeScript, and Node.js** for web application testing.
- Implemented reusable page object models (**POM**) and **modular test architecture** to improve maintainability and scalability.
- **Developed automated UI and API test cases** with parallel execution support, improving regression testing efficiency.
- GitHub: [Automation Testing Framework](#)

EDUCATION

Birla Institute of Technology And Science, Pilani
Master of Engineering (M.E.)

Jul 2019 – May 2021

Jabalpur Engineering College, Jabalpur
Bachelor of Engineering (B.E.)

Jun 2013 – Apr 2017
